

Job Title: Senior Programmer

Location: Cockeysville, MD (Remote)

ABOUT THE POSITION:

We are seeking a highly skilled, dedicated, and self-driven Senior Programmer who is passionate about designing, developing, and maintaining compelling cloud-integrated applications. The ideal candidate will have extensive experience in web technologies, C#, .NET Core, and cloud services. They will be proficient in SQL Server and have a strong understanding of RESTful APIs. The role requires someone who can design and implement scalable, secure, and high-performance applications while leading development projects and mentoring our junior developers. Join a passionate team of developers in an exciting and dynamic environment, where you'll contribute directly to the success of our team, company, and clients.

KEY RESPONSIBILITIES:

- Design, develop, and help maintain high-quality cloud and on-premises solutions.
- Work closely with stakeholders to deliver meaningful solutions.
- Help continually improve development processes, tools, and methodologies.
- Conduct code reviews to ensure high standards.
- Mentor junior developers.

KEY QUALIFICATIONS:

- **Extensive Experience in C# and .NET Development:** Over 6 years of hands-on experience in C# programming and .NET framework development.
- **Web Technologies Expertise:** Proficient in HTML, CSS, and JavaScript with a strong understanding of modern web development practices and frameworks.
- **RESTful API Development:** Proven track record in designing, building, and maintaining RESTful APIs.
- **Microsoft Azure Expertise:** Extensive experience with Azure services including Azure App Service, Azure Storage, Azure SQL/Azure Managed Database, and Azure Functions.
- **Blazor and Web Assembly:** Experience with Blazor and/or Web Assembly is a significant advantage.
- **DevOps and CI/CD:** understanding of DevOps practices, including continuous integration and continuous deployment (CI/CD) pipelines, and version control systems like Git.
- **Database Management:** Proficient in SQL Server, with the ability to write complex queries, develop stored procedures, and optimize database performance.
- **Application Design:** Demonstrated ability to design and implement scalable, secure, and high-performance applications.
- **Collaboration and Communication:** Excellent teamwork and communication skills
- **Problem-Solving Skills:** Strong analytical and problem-solving abilities
- **Educational Background:** Bachelor's or Master's degree in Computer Science, Information Technology, or equivalent professional experience.
- **Certifications:** Relevant certifications (e.g., Microsoft Certified: Azure Developer Associate, Microsoft Certified: Azure Solutions Architect Expert) are a plus.
